Portfolio: <https://jeamshiv.netlify.app/> | LinkedIn: <https://in.linkedin.com/in/jeamshiv> | GitHub: <https://github.com/jeamshiv>

SKILLS SUMMARY

- **Languages:** JavaScript, SQL
- **Frameworks & Libraries:** React.js, Next.js, React Native, Node.js, Tailwind CSS, Bootstrap, Ant Design
- **Databases & APIs:** MySQL, MongoDB, REST APIs, GraphQL
- **Version Control & Cloud:** Git, AWS (especially EC2 & Amplify)
- **AI Tools** Cursor, Claude AI, GitHub Copilot, ChatGPT (prompt engineering)
- **Soft Skills:** Quick learner, enthusiastic about new tech, excellent communicator, and effective collaborator.

WORK EXPERIENCE

- Programming.com | [LINK](#)

Sep 2025 – Present

 - Working as a software developer using Next.js and React to build scalable web application.
 - Developing responsive user interfaces, optimizing performance, and ensuring accessibility and cross-browser compatibility.
- ScaleupAlly | [LINK](#)

Jr. Software Engineer → Software Engineer → SDE-II | Dec 2021 – Aug 2025

 - Worked as a full-stack developer using the MERN stack, handling both frontend and backend development.
 - Built scalable web applications by collaborating with cross-functional teams and continuously improving code quality.
- Cyberflow | [LINK](#)

May 2021 – Dec 2021

 - Developed and maintained responsive user interfaces using React, while also contributing to mobile app development with React Native.
 - Collaborated with teams to implement new features and enhance performance.
- Innovatia Marketing & Technology Solutions | [LINK](#)

Oct 2020 – Oct 2020

 - I worked there as a PHP, WordPress & Frontend Web Developer.
 - Contributed to frontend development efforts, focusing on performance optimization and cross-browser compatibility.

PROJECTS

- Nmas (N+) – <https://www.nmas.com.mx>

Sep 2025 – Present

 - **Role:** Next.js Developer responsible for building and optimizing a large-scale news media platform for Mexico.
 - **Responsibilities:**
 - Developed pixel-perfect, responsive UI using Next.js and Tailwind CSS.
 - Optimized performance with caching strategies and best practices.
 - Integrated GraphQL for efficient data fetching.
 - Ensured accessibility (a11y) and cross-browser compatibility.
 - Collaborated with internal and Mexico-based teams to coordinate feature delivery, resolve issues, and enhance platform functionality.
 - **Technologies Used:** Next.js, React.js , GraphQL, Tailwind CSS
- Cryptordle – cryptordle.com

May 2025 – Sep 2025

 - **Role:** Sole frontend developer responsible for updating and enhancing the Cryptordle platform across multiple interfaces.
 - **Responsibilities:**
 - Refactored and implemented new features in the existing React Native mobile app, available on the [Google Play Store](#).
 - Developed and maintained the landing website using Next.js integrated with Prismic CMS.
 - Built and optimized the user-facing web application with Next.js for improved performance and user experience.
 - Designed and managed the admin panel using React.js, facilitating efficient content and user management.
 - **Technologies Used:** React Native, React.js, Next.js, Prismic CMS

- Integrated multiple payment gateways (Stripe and Clearent) into the web application to support both online and POS terminal transactions.
- For Stripe:
 - Implemented card payments, saved card payments, ACH payments, Affirm, and Afterpay.
 - Developed functionalities for saving, listing, and deleting payment cards.
 - Integrated a POS terminal interface within the web app to enable terminal payments.
- For Clearent:
 - Developed support for card payments, saved card payments, and ACH payments.
 - Implemented modules for saving, listing, and deleting payment cards.
 - Integrated terminal payment processing from the web app.
- Added refund capabilities for both gateways, ensuring smooth transaction reversals.
- Developed a robust jewelry label printing feature with full PDF export capabilities, supporting multiple label sizes and customizable layout options.
- Tech Stack – Frontend: React.js, GraphQL, Backend: Node.js, Strapi, GraphQL

RTF Insurance | [LINK](#)

- Developed a responsive website for RTF Insurance using Next.js, integrated with Prismic as the headless CMS to facilitate efficient content management.

Podcet | [LINK](#)

- Developed a comprehensive booking system web application that enables users to book podcast themes seamlessly.
- Built the frontend using Next.js, ensuring a fast, responsive, and intuitive user interface.
- Engineered the backend with Node.js and Strapi to efficiently manage bookings, user profiles, and podcast theme data.
- Integrated Stripe to support secure payments via card, Google Pay, and Apple Pay.
- Implemented passwordless login via email links to streamline the user authentication process.
- Designed and implemented an automated email reminder system that sends timely booking notifications, boosting user engagement and significantly reducing no-shows.
- Overall, created an end-to-end booking system that optimizes the podcast theme selection and payment process.

Ignou Tutor - Website | [LINK](#) & App | [LINK](#)

- Developed the front-end for both web (Next.js) and mobile (React Native) interfaces to create a seamless and intuitive user experience.
- Integrated Firebase services and Google login for the mobile app to ensure secure user authentication.
- Collaborated with a friend (Dipanshu) who managed the backend development using Node.js and MySQLi on Digital Ocean, implementing critical functionalities that fetch study materials, previous year question papers, and grade cards based on user inputs (enrollment number and program code), thereby supporting features like offline access and auto-fetch mechanisms.
- Provides IGNOU students with seamless access to study materials, previous year question papers, assignments, grade cards, and official announcements.
- Aim to empower students by making learning resources available anytime, anywhere.
- **Tech Stack** – Website: Next.js, App: React Native, Firebase services, Google Login, Backend: Nodejs, MySQLi

NCERT New Books– [LINK](#)

- **Role:** React Native Developer responsible for developing and maintaining an AI-powered NCERT books and audiobooks application.
- **Responsibilities:**
 - Built a cross-platform mobile application using React Native Expo with a responsive and user-friendly interface.
 - Integrated Firebase services for database management, analytics, and cloud storage.
 - Implemented AI-powered text-to-image generation using xAI integration.
 - Integrated Hugging Face model ai4bharat/indic-parler-tts for multilingual audiobook and text-to-speech generation.
 - Utilized Cloudflare R2 for efficient audiobook storage and media delivery.
 - Developed features for NCERT book reading, audiobook playback, and enhanced user experience.
- **Technologies Used:** React Native Expo, Firebase, Cloudflare R2, xAI, Hugging Face, AI4Bharat Indic Parler TTS

Lawyered | [LINK](#)

- Integrated Stripe payment processing into the platform to facilitate secure transactions for legal contract document services and electronic signatures.

Exuity | [LINK](#)

- Developed an online auction platform that connects property owners with real estate investors, allowing owners to sell fractional property values while investors compete on the lowest yield.
- Implemented the main website using Next.js and built the customer dashboard with React.js, supported by a Node.js backend using MySQLi.

CERTIFICATES

Spot Award (ScaleupAlly) | [CERTIFICATE](#)

Mar 2023

- Awarded for exceptional performance and outstanding contributions to team success at ScaleupAlly.
-

EDUCATION

Indira Gandhi National Open University (IGNOU) - Bachelor of Arts

2018 – 2021

Arth Institute - IT-Expert Diploma in IT

2018 – 2020

Government School - 12th Pass (CBSE Board)

2018

Government School - 10th Pass (CBSE Board)

2016
